ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, September, 1962. Washington 25, D. C. December, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)
	TOTAL IMPORTS FOR CONSUMPTION			1,345,046,284
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE			88,837,373
010	Animals, edible (except for breeding)	0010600-0015500	8	4,931,867
020	Meat products	0018300-0035500	8	45,542,601

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, October, 1962. Washington 25, D. C. January, 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP--Continued

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORTS OF WOOL RUGS OMITTED FROM THE OCTOBER 1962 STATISTICS

As a result of processing errors, the following transactions were inadvertently omitted from the October 1962 import statistics:

Schedule A Number and Commodity Description	Country of Origin	Sq. Feet	Value (dollar)
3670 030 - Wool rugs, etc., velvet and tapestry, not over 40 cents sq. ft.	United Kingdom	1,638	438
	Belgium	30,212	8,722
	Total	31,850	9,160
3670 040 - Wool rugs, etc., Wilton not over 40 cents sq. ft.	United Kingdom	324	120
	Belgium	834,802	188,093
	Japan	176,208	47,224
	Total	1,011,334	235,437
3670 120 - Wool rugs, etc., Brussels, over 40 cents sq. ft.	France	4,886	3,668
	Total	4,886	3,668
3670 130 - Wool rugs, etc. velvet & tapestry, over 40 cents sq. ft.	United Kingdom	23,250	15,017
	Belgium	692,641	395,457
	Italy	143,695	85,720
	Japan	21,954	10,245
	Total	881,540	506,439
3670 140 - Wool rugs, etc., Wilton over 40 cents sq. ft.	Sweden	425	552
	United Kingdom	5,365	3,865
	Belgium	55,034	28,053
	France	14,286	10,175
	Italy	35,661	17,961
	Japan	117,985	56,095
	Total	228,756	116,701
3670 150 - Wool rugs, etc., n.s.p.f., over 40 cents sq. ft.	United Kingdom	221	385
	Belgium	4,720	2,160
	W. Germany	263	216
	Spain	6,957	4,985
	Japan	14,976	7,420
	Total	27,137	15,175

The October statistics will not be corrected to include these shipments because of the large amount of work involved and the fact that the effect of such changes on the overall statistics would be small (about 1/10 of 1 percent). Arrangements have been made, however, to carry these data over into the November 1962 statistics.

NEW SCHEDULE A COMMODITY NUMBERS BEING USED FOR COMPILING COTTON TEXTILE IMPORT STATISTICS BEGINNING OCTOBER 1962 - CERTAIN COMMODITY NUMBERS IN EFFECT THROUGH SEPTEMBER 1962 ARE OBSOLETE

Effective with October 1962 data, certain new Schedule A commodity classifications are being used to report the United States import statistics on textiles. The changes being made result from the need for more detailed statistics to be used in evaluating United States imports of certain textile manufactures in terms of the provisions of the Long-term International Cotton Textile Agreement which became effective October 1, 1962.

Two tables are presented below showing (1) the new Schedule A numbers under which certain textile commodities are being reported beginning October 1962, along with the unit(s) of quantity and a brief commodity description for each number, and (2) a list of obsolete and new Schedule A numbers effective October 1962. Commodity numbers which do not appear in either list are not affected by the changes.

Table 1.—NEW SCHEDULE A COMMODITY NUMBERS BEING USED FOR COMPILING IMPORT STATISTICS BEGINNING OCTOBER 1962

Schedule A number	Units of quantity		Commodity description
	First unit	Second unit	
3048 212	Sq. Yd.	Lb.	ABC sheetings, unbleached, carded
3048 216	Sq. Yd.	Lb.	Soft-filled sheetings, unbleached, carded
3048 222	Sq. Yd.	Lb.	Osnaburgs, unbleached, carded
3048 226	Sq. Yd.	Lb.	Bed sheeting, unbleached, combed
3048 228	Sq. Yd.	Lb.	Other sheetings, unbleached, carded
3048 232	Sq. Yd.	Lb.	Other sheetings, unbleached, combed
3048 360	Sq. Yd.	Lb.	1x1 Duck, unbleached, carded
3048 363	Sq. Yd.	Lb.	1x1 Duck, unbleached, combed
3048 366	Sq. Yd.	Lb.	2x2 Duck, unbleached, carded
3048 369	Sq. Yd.	Lb.	2x2 Duck, unbleached, combed
3048 370	Sq. Yd.	Lb.	1x2 Duck, unbleached, carded
3048 373	Sq. Yd.	Lb.	1x2 Duck, unbleached, combed

3163 003	Lb.	--	Lace
3163 004	Lb.	--	Other
			Valued $150 or more per pound:
3163 005	Lb.	--	Lace
3163 006	Lb.	--	Other
			Nets and nettings, not embroidered:
3166 692	Lb.	--	Made on a Mechlin machine
3166 695	Lb.	--	Other
			Cotton laces, lace fabrics, and lace articles:
			Made on a bobbinet-jacquard machine whether or not embroidered:
3168 001	Lb.	--	Lace
3168 002	Lb.	--	Other
			Made on a Levers (including go-through) lace machine, whether or not embroidered:
			Full gauge, 12 point or finer
			Made with independent beams:
3168 003	Lb.	--	Lace
3168 004	Lb.	--	Other
			Not made with independent beams:
3168 005	Lb.	--	Lace
3168 006	Lb.	--	Other
			Not full gauge or 12 point or finer:
3168 007	Lb.	--	Lace
3168 008	Lb.	--	Other
			Other Machine-made:
3168 009	Lb.	--	Lace
3168 010	Lb.	--	Other
			Lace window curtains, nets, nettings, pillow shams, bed sets, and articles and fabrics, plain or jacquard-figured, made on the Nottingham lace-curtain machine:
3200 012	Lb.	--	Lace-window curtains and drapes including panels and valances
3200 015	Lb.	--	Other
3220 202	Lb.	No.	Dish towels
3220 205	Lb.	Sq. Yd.	Fabrics, in the piece
3220 207	Lb.	--	Curtains, paneling, panels, and valances, n.e.s.
3220 212	Lb.	--	Other
			All-overs, edgings, flouncings, flutings, gallons, gimps, insertings, neck rufflings, ornaments, quillings, ruchings, trimmings, and tuckings; all of the foregoing and articles wholly or in part thereof, but not in part of lace and not ornamented; fringes and articles wholly or in part of fringes, n.e.s. (except wearing apparel), not in part of lace and not ornamented; braids of cotton (except hat braids), if loom-woven and ornamented in weaving, or made by hand, or on a braid, knitting, or lace machine; and articles (not wearing apparel) in part of braids (except hat braids):
3220 862	Lb.	--	Cotton lacings and laces, braided
3220 865	Lb.	--	Cotton tubular braids
3220 868	Lb.	--	Cotton all-overs, edgings
			Rags, except for paper-making:
3227 112	Lb.	--	Wiping
3227 115	Lb.	--	Other
			Cords:
3230 232	Lb.	--	Stranded
3230 235	Lb.	--	Other
3230 238	Lb.	--	Tassels and cords, and tassels
			Fabrics with fast edges, not over 12 inches wide, and articles made therefrom, nspf.:
3230 272	Lb.	--	Cotton zipper tape
3230 275	Lb.	--	Typewriter ribbon, whether or not on a spool
3230 277	Lb.	--	Garters, suspenders, and braces
3230 278	Lb.	--	Other
3230 352	Lb.	--	Other yarns in chief value of cotton
			Articles of pile construction (except terry-woven towels):
3230 682	Lb.	--	Curtains and drapes
3230 685	Lb.	--	Other furnishings, nspf.
3230 688	Lb.	--	Other articles, nspf.
3230 712	Lb.	--	Cotton manufactures, n.e.s.
			Coated or filled cotton cloths, nspf.:
3971 010	Sq. Yd.	--	Prepared for use as artists' canvas
3971 020	Sq. Yd.	--	Other

In addition to the new commodity numbers for cotton textiles listed above, separate classifications were established for the following:

Schedule A commodity number	Commodity description	Unit of quantity
6200 900[10/62]	Portable kerosene or gasoline compressed air stoves, brass or bronze (from 6458 900)	--
7100 215[9/62]	Loud speaker parts (from 7100 970[7/62])	--

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, November, 1962. Washington 25, D. C. February, 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

INCLUSION OF OCTOBER 1962 IMPORTS OF WOOL RUGS IN THE NOVEMBER 1962 STATISTICS

Under Schedule A commodity numbers 3670 030, 3670 040, 3670 120, 3670 130, 3670 140 and 3670 150 the data shown in this report for November 1962 include the following transactions which were inadvertently omitted from the October 1962 statistics:

Schedule A Number and Commodity Description	Country of Origin		Sq. Feet	Value (dollar)
3670 030 - Wool rugs, etc., velvet and tapestry, not over 40 cents sq. ft.	United Kingdom		1,638	438
	Belgium		30,212	8,722
		Total	31,850	9,160
3670 040 - Wool rugs, etc., Wilton not over 40 cents sq. ft.	United Kingdom		324	120
	Belgium		834,802	188,093
	Japan		176,208	47,224
		Total	1,011,334	235,437
3670 120 - Wool rugs, etc., Brussels, over 40 cents sq. ft.	France		4,886	3,668
		Total	4,886	3,668
3670 130 - Wool rugs, etc., velvet and tapestry, over 40 cents sq. ft.	United Kingdom		23,250	15,017
	Belgium		692,641	395,457
	Italy		143,695	85,720
	Japan		21,954	10,245
		Total	881,540	506,439
3670 140 - Wool rugs, etc., Wilton over 40 cents sq. ft.	Sweden		425	552
	United Kingdom		5,365	3,865
	Belgium		55,034	28,053
	France		14,286	10,175
	Italy		35,661	17,961
	Japan		117,985	56,095
		Total	228,756	116,701
3670 150 - Wool rugs, etc., n.s.p.f., over 40 cents sq. ft.	United Kingdom		221	385
	Belgium		4,720	2,160
	West Germany		263	216
	Spain		6,957	4,985
	Japan		14,976	7,420
		Total	27,137	15,175

The October statistics were not corrected to include these importations because of the large amount of work involved, in addition to the fact that the effect of the changes on the overall statistics would have been very small (about 1/10 of 1 percent).

POLICY IN REGARD TO RELEASE OF FOREIGN TRADE AND SHIPPING STATISTICS REPORTS PREPARED FOR PRIVATE ORGANIZATIONS ON A COST BASIS

The monthly issues of Reports FT 110, FT 410, FT 800 and FT 985 list under the title "Foreign Trade and Shipping Statistics Reports on a Cost Basis" arrangements currently made for the preparation of special reports on foreign trade and shipping for public subscribers on a cost basis. The price is also shown for each of these reports.

The preparation of these reports on a cost basis is carried out in accordance with the Bureau of the Census "Policy Governing Special Work and Services" set forth in current issues of the Catalog of United States Census Publications. This reads in part as follows:

"The Congress appropriates funds to the Bureau to carry out certain projects. Since funds are limited, the Bureau cannot prepare or publish all the useful tabulations of the information collected. Administrative decisions must be made with regard to what information will serve the largest number of needs and how much of the information of general interest can be made available within the limits of the available funds. The use of the filled-in questionnaires and schedules is restricted by law to employees of the Bureau of the Census. The use of specific punch cards or magnetic tapes is restricted in accordance with the information shown thereon.

"The work sheets and tabulation sheets, which show more detail than is found in published reports, can be made available through some method of duplication, such as photoprinting or transcription. Basic source material, such as schedules or punched cards, contain data that can be tabulated and used to furnish additional needed information. Arrangements can be made, in some instances, to furnish information in advance of publication. Such arrangements entail additional cost, which has to be recovered.

"Furthermore, there are available in the Bureau a variety of skills, equipment, and records which are maintained for meeting the regular commitments of the Bureau. These facilities can serve the needs of other Government agencies and other groups. The skills, equipment, and other resources can be made available for statistical operations such as survey design, mailing, field collection, machine tabulation, population estimates and forecasts, and similar tasks. To some extent members of the staff can be made available for consultation and planning.

"Services as indicated above are furnished at cost by the Bureau under the conditions described below. Cost is interpreted to mean the actual cost to the Bureau of the Census, including the cost of planning the special work, and appropriate overhead charges.

"Special transcriptions and tabulations of Census data.—Special transcriptions and tabulations of data in the files of the Bureau of the Census will be undertaken on a cost basis as requested, provided there is no serious interruption of the regular work program of the Bureau. Those requesting special tabulations should have a clear understanding that the data are based on surveys paid for by public funds and are, therefore, public property. The purposes for which such tabulations are obtained must not be contrary to the public interest nor must they be used to give unfair commercial or other advantage to any person or group.

"In making such special tabulations available, the Bureau may, at its discretion, specify either that the material is for the information of the purchaser only and may not be published, or that any proposed publication of such material must be cleared with the Bureau before publication. Such restrictions will provide a basis for protection against possible misquotation of Census data, and also against the implication that data of low reliability and not published by the Bureau of the Census have, in effect, a guarantee by the Bureau as to their accuracy. All Census data, furnished through special tabulations, will be accompanied, so far as feasible, by appropriate statements relative to the limitations of the data and the recipient should be requested to use these statements and to give appropriate credit to the Bureau for the information published.

"Special tabulations paid for by nongovernmental groups will be undertaken only with the specific understanding that:

1. The material may be published subsequently by the Bureau and made generally available either without charge or at cost of publication if the Bureau regards the material to be of general interest. If such action is taken within six months, the Bureau will notify all purchasers of such determination and the reasons therefore.

2. If not published, it may be made available to other Government agencies or to appropriate nonprofit research groups without charge or at cost of duplication.

3. If not already published by the Bureau, a second request by other than a Government agency for the same information will generally be handled in the following manner:

   a. If a job has not been completed, the costs will be appropriately divided and results will be furnished to both parties.

   b. When information previously furnished to commercial groups or private individuals is within a six-month period requested by other commercial groups or individuals, the subsequent party (or parties) will be charged not less than the amount paid by the first party obtaining the information. If the cost to the Bureau for furnishing the information to the subsequent party is significantly less than that charged for the original information, the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau and refunds made as necessary, provided that the amount for refund exceeds 10 percent of the cost of the original job, or $25, whichever is larger. After a six-month period, subsequent subscribers will be charged only the additional cost to the Bureau, if any, and no refunds to prior purchasers will be considered.

   c. If for any reason the Bureau feels that the purchaser of a special tabulation is making unfair or improper use of the information furnished, it may take such action as is deemed appropriate to protect the public interest, or otherwise remedy the situation.

"In order to keep the public informed of special tabulations which have been furnished, the Bureau will list special tabulations, except for small projects, in the Catalog of United States Census Publications."

Certain specific points in regard to the application of these policies to the various types of foreign trade reports are described below:

Type A. Advance reports containing final monthly figures not yet available in duplicated report form. Advance reports present postings from machine tabulation sheets at the time the sheets are made publicly available. These sheets are made available several weeks prior to the date on which reports containing the information are distributed in duplicated form.

POLICY IN REGARD TO RELEASE OF FOREIGN TRADE AND SHIPPING STATISTICS REPORTS PREPARED FOR PRIVATE ORGANIZATIONS ON A COST BASIS—Continued

Since the information in advance reports is already publicly available at the time the advance reports are released, the data have to all intents and purposes been published by the Bureau of the Census and the Census "Policy Governing Special Work and Services" is therefore largely inapplicable. Anyone wishing the same type of report can obtain it only on paying the full price of the report, the price in all cases representing the actual clerical cost of posting information from the unduplicated machine tabulation sheets already made available for public reference.

Type B. Reports presenting recompilations of information already published or already made available for public reference in the form of machine tabulation sheets.

These reports may be very simple and may for example merely represent recompilations of information from machine sheets available for public reference. For example, a report of this type may present information on how much of a particular commodity was exported from the United States through a particular Customs district. This information is available for public reference in different form in copies of machine tabulation sheets showing exports in a commodity by country of destination by Customs district arrangement. The report in this example would essentially consist of combining the figures of the movement to each country through the particular Customs district into a total of the amounts shipped to all countries through that Customs district.

Some Type B reports are considerably more complicated rearrangements of information already publicly available. For example, SM 705, which is regularly made available for public reference, presents information of exports by vessel from the United States in United States port by foreign port by commodity by country arrangement. The subscriber to a report to be prepared on a cost basis may wish all of this information rearranged into commodity by United States port arrangement with no segregation by foreign port of unlading. Some such reports can be prepared by manually rearranging the information in the SM 705 in the form requested. In other cases it is substantially more efficient to retabulate the Bureau of the Census source material which was used to prepare the SM 705 into the form requested. The person requesting and paying for such a report pays for the cost of compiling the information either manually or by electronic equipment, whichever is more efficient.

The subscriber to Type B reports appears to be entitled to some assurance that other private organizations and individuals will not under ordinary circumstances obtain access to the information at the same time at no cost or at a substantially reduced cost. Type B reports will therefore ordinarily not be made available to the public without charge or at a substantially reduced cost until six months after the reports have been transmitted to the person or organization paying for them. However, the Bureau of the Census reserves the right to publish the data at an earlier date under circumstances such as those described in the extract from the Bureau's "Policy Governing Special Work and Services" quoted above. In such cases the subscriber will be notified that public release is being made prior to the expiration of the six-month interval. The subscriber will not specifically be notified of any release at the end of the six-month interval. Public release by the Bureau prior to the expiration of the six-month interval will not normally occur where the subscriber obtained, and is using, the information for purposes of market research or to determine his own competitive position in the market for a particular product or service.

Where the Bureau receives requests from private organizations or individuals for the information in Type B reports before the expiration of the six-month or other interval described above, a policy will be followed of requesting the inquirer to pay the same amount as the person who originally subscribed to the report.

If the cost to the Bureau for furnishing the information to the subsequent party (parties) is significantly less than that charged for the original information the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau and refunds made as necessary, provided that the amount for refund exceeds 10 percent of the cost of the original job, or $25, whichever is larger.

Although information in such reports is being made available on request to Government agencies for their own use during the period the report is not to be released, such agencies are not permitted to release the information publicly without permission having been first obtained from the Bureau. Such permission is granted only under circumstances falling within the Bureau policy quoted above.

Type C. Reports which present information not publicly available in any form. Included in this are reports showing separate statistics on exports or imports of individual products included, without segregation, in a Schedule B or a Schedule A commodity classification regularly shown in the published statistics, and other reports containing information on exports and imports not available in published reports or in unduplicated copies of machine tabulation sheets made available for public reference. Information in Type C reports can, therefore, only be obtained from information on punch cards, electronic computer tape, Shipper's Export Declarations, or import entry forms not publicly available.

This type of report would include for example a report on shipments by air from the United States to foreign countries. Information on exports by air is not now being separately compiled by the Bureau and a separate tabulation of exports by air could be prepared only by the use of information not publicly available but contained on Shipper's Export Declarations.

In general, the policy followed in making Type C reports publicly available is similar to the policy followed for Type B as described above. Since in contrast to Type B, Type C reports represent newly-compiled information not otherwise publicly available, there is a greater likelihood that the Bureau may find it necessary to release the information in Type C reports at a date earlier than six months after transmittal to the subscriber.

Preliminary Investigations

In addition to the actual work involved in preparing Type B and Type C reports, there are, in some cases, considerable amounts of work required in preliminary investigations of basic records even before estimates of the cost of preparing the reports can be made. These preliminary investigations of basic records, depending on the information to be obtained for the report, include such determinations as the following:

1. Determination of whether the desired information is available.
2. Determination of whether the release of desired information would tend to reveal the transactions of individual firms, in which case the information would not be released.
3. The determination of the best procedure under which the information would be obtained. This determination would include the comparison of costs under alternate procedures and the selection of the procedure with the lowest cost.

Preliminary investigations along the lines outlined above are not required for all reports. However, if a preliminary investigation is required before the cost of some reports can be estimated, persons requesting such reports will be charged the cost of the investigation. Wherever it is necessary to make a charge for preliminary investigation, the charge will usually be $125.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

Abbrev.	Description	Abbrev.	Description	Abbrev.	Description

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP---Continued

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)
	GROUP 4—WOOD AND PAPER—Continued

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, December, 1962. Washington 25, D. C. February, 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]
